Most of what has been learned about how the brain mediates behavior comes from experiments of nature where a stroke or other damage to the brain produces changes in a persons behavior. In Matter of Mind, one of the leading figures in behavioral and cognitive neurology uses patient vignettes and other examples from his rich professional life to show just how much knowledge about brain functions such as reading, writing, language, control of emotions, skilled movement, perception, attention, and motivation has been gained from the study of patients with diseases of or damage to the brain. No knowledge of neurology or neuroscience is required to understand the book, which is intended for neurological patients and their families. It will also be of interest to professionals who study the brain or treat patients with brain damage including neuropsychologists, neurologists, neuroscientists, psychologists, psychiatrists, speech pathologists, occupational and physical therapists, and their students and trainees.
