The Tsunami of 2004 in Sri Lanka: Impacts and Policy in the Shadow of Civil War

This book is based on empirical research in Sri Lanka conducted after the catastrophic tsunami which hit the country in December 2004. The aims of the research have been to develop new knowledge on post-crisis reconstruction and recovery work, on how to bridge the knowledge gap between researchers and practitioners, as well as trying to use past research experiences from Sri Lanka to learn about the present day situation. The chapters use a common analytical frame related to the 'policy narratives' of post-tsunami recovery in the shadow of war, and deal with housing reconstruction, livelihoods, internally displaced, humanitarian interventions and protracted conflicts.

The authors represent various social scientific fields and they have experience from different geographical areas of Sri Lanka.

This book was published as a special issue of *Norsk Geografisk Tidsskrift*.
