## Leading Futures: Global Perspectives on Educational Leadership

**A first-of-its-kind book on educational leadership with a global perspective**

This book offers multiple perspectives on educational leadership from the viewpoint of scholars, policymakers and practitioners. It considers leadership in context and highlights the importance of cultural influences in shaping and forming leadership practices.

It is primarily concerned with 'leading futures' and the challenges faced by leading schools and school systems in an era of fast-paced technological change. It looks at leadership practices across four different levels (system, professional, leader and learner) and explores the connections therein. The book argues that these four levels are often viewed and described independently but in reality they are inherently interconnected and integrally related.

In short, this book takes a multilevel, multicultural and multicontextual look at contemporary educational–leadership practice. Through this comparative lens, it presents new ideas, knowledge and insights that would be relevant and ultimately useful to educational leaders around the globe.
