Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition)

The public health impact of foodborne disease in both the developed and developing world is high. Foodborne illness is a major cause of disease and some infections can be fatal. With the rise of globalisation, trends towards minimal processing, and changes in food consumption patterns, the food industry, food safety agencies, and public health officials must coordinate their activities to monitor the interactions between foodborne pathogens and food consumers. This important collection reviews vital issues in the relationship between consumers and foodborne bacteria, viruses and parasites, and surveys how interactions between microorganisms and their human hosts influence foodborne disease.

Part one considers factors which increase the risk of exposure to foodborne hazards, exploring issues such as the demographics of our changing population and trends in agricultural management. Part two examines human host factors which influence foodborne disease. It includes chapters on non-specific host defences, immunity to foodborne pathogens and heightened susceptibility to foodborne disease due to underlying illness or pregnancy. The final part of the book reviews the mechanisms used by numerous pathogenic agents to invade, evade, colonise and reproduce in the human host. Quantitative microbiological risk assessment (QMRA), essential for the protection of public health, is also covered.

With its distinguished editor and international team of contributors, Food consumption and disease risk: consumer-pathogen interactions will be an essential reference for microbiologists, R&D and QA staff in the food industry.

- Considers factors that increase the risk of exposure to foodborne hazards
- Examines the human factors that influence disease
- Distinguished editor and international team of contributors

From reader reviews:

Anna Williams:

This Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) usually are reliable for you who want to become a successful person, why. The key reason why of this Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) can be on the list of great books you must have is giving you more than just simple reading food but feed an individual with information that perhaps will shock your earlier knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in the e-book and printed people. Beside that this Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) forcing you to have an enormous of experience for example rich vocabulary, giving you test of critical thinking that we understand it useful in your day exercise. So , let's have it and luxuriate in reading.

Laura McLaughlin:

The publication untitled Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) is the guide that recommended to you to study. You can see the quality of the publication content that will be shown to you actually. The language that publisher use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, therefore the information that they share for your requirements is absolutely accurate. You also will get the e-book of Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) from the publisher to make you far more enjoy free time.

Kevin Pennell:

The book Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) has a lot of information on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. Tom makes some research ahead of write this book. This specific book very easy to read you may get the point easily after perusing this book.

Robert Higby:

Your reading sixth sense will not betray a person, why because this Food Consumption and Disease Risk: Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) e-book written by well-known writer we are excited for well how to make book that could be understand by anyone who else read the book. Written with good manner for you, leaking every ideas and producing skill only for eliminate your personal hunger then you still question Food Consumption and Disease Risk:

Consumer-Pathogen Interactions (Woodhead Publishing Series in Food Science, Technology and Nutrition) as good book not merely by the cover but also through the content. This is one e-book that can break don't judge book by its cover, so do you still needing yet another sixth sense to pick this specific!?! Oh come on your examining sixth sense already alerted you so why you have to listening to a different sixth sense.
