## Applied Regional Growth and Innovation Models (Advances in Spatial Science)

Modern spatial-economic systems exhibit a high degree of dynamics as a result of technological progress, demographic evolution or global change. In the past decade, an avalanche of new regional economic growth and innovation models has been put forward. This volume contains a unique collection of operational models of a strong applied nature that may be seen as original landmarks in the rich tradition of spatial-economic growth modelling. The contributors are recognized experts from different parts of the world. ?
