Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation Barry Groves

Fluoride is more toxic than lead, yet it is routinely added to the drinking water of Ireland and Britain. In *Fluoride: Drinking Ourselves to Death?*, Barry Groves presents an array of convincing and persuasive arguments that dismantle the commonly held belief that the fluoridation of water is beneficial to our health.

The fluoridation of water has been used for the prevention of tooth decay for over fifty years. During this time little research has been done to ascertain whether it works. The chemicals used are classified as toxic industrial waste, yet no study has ever been conducted into their safety for human consumption.

At the same time, research has uncovered serious side effects including death, cancer, skeletal fluorosis, osteoporosis, dementia, lowered IQ, kidney damage and even increased dental decay. Fluoride is only slightly less toxic than arsenic and all the evidence points incontrovertibly to the harm caused by fluoride to human, plant and animal life. Yet it is routinely added to the drinking water of five million people in Britain and more than two and a half million people in Ireland.

Strongly opposed throughout the world, water fluoridation is far less widely accepted than its proponents would have us believe. Only two percent of the people of Western Europe have their water fluoridated — almost all of them within Britain and Ireland. Despite this, dental organisations lobby governments to compel everyone to ingest fluoride, whether they want it or not and without regard to possible harm.

The vast majority of dentists maintain that the fluoridation of water is not debatable. In this book, Barry Groves assembles evidence to refute every single argument made by the dental establishment in favour of fluoridation. This carefully researched and persuasively written book demonstrates that the case for fluoridation of water is based on poor science and dogmatic ignorance rather than on any scientifically proven benefit to public health. His conclusions are truly alarming for everyone concerned with their own health, that of their families and of society in general.

Fluoride: Drinking Ourselves to Death?: Table of Contents

1. Water Fluoridation
2. Fluoride and Water Safety
3. Cancer and Fluoride
4. Safe Limit for Fluoride
5. Research into Fluoride
6. Fluoridation and High Infant Mortality
7. Fluoride as a Cumulative Poison
8. Fluoride Kills
9. People at Risk from Fluoride
10. EPA Scientists and Fluoride

11. Support for Fluoridation Diminishes in America
 12. The Totality of Fluoride
 13. The Ethics and Legality of Fluoridation
 14. Dental Fluorosis
 15. The Dose Makes the Poison
 16. Fluoride-Related Bone Problems, Part One
 17. Fluoride-Related Bone Problems, Part Two
 18. The Death of Science
 19. The Poor and Fluoride Toxicity
 20. Sugar and Truth Decay
 21. Money Down the Drain
 22. The History of Water Fluoridation, Part One
 23. Arsenic and Old Lies
 24. The History of Water Fluoridation, Part Two
 25. Dentrifrice — or Rodenticide?
 26. Europe Against Fluoride
 27. Skeletal Fluorosis
 28. The Public and Fluoride
 29. Legislating for Fluoride
 30. Fluoride Not an Essential Nutrient
 31. Fluoride and Controversy
 32. The UK Review: The Final Word on Fluoride?
 33. Are You at Risk? Conclusion
- Appendix: Scientific Opposition to Fluoride

From reader reviews:

Doreen Looney:

What do you concerning book? It is not important together with you? Or just adding material if you want something to explain what you problem? How about your time? Or are you busy individual? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Every individual has many questions above. They must answer that question simply because just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is proper. Because start from on kindergarten until university need that Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation to read.

Virginia Gauvin:

It is possible to spend your free time to learn this book this publication. This Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation is simple to create you can read it in the playground, in the beach, train and soon. If you did not have got much space to bring often the printed book, you can buy the actual e-book. It is make you simpler to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Keith Lugo:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you could have it in e-book way, more simple and reachable. This Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation can give you a lot of friends because by you taking a look at this one book you have point that they don't and make anyone more like an interesting person. This kind of book can be one of one step for you to get success. This reserve offer you information that possibly your friend doesn't know, by knowing more than additional make you to be great folks. So , why hesitate? Let me have Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation.

Dixie Jones:

Guide is one of source of information. We can add our understanding from it. Not only for students and also native or citizen will need book to know the upgrade information of year to help year. As we know those publications have many advantages. Beside all of us add our knowledge, may also bring us to around the world. From the book Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation we can have more advantage. Don't you to definitely be creative people? To become creative person must want to read a book. Simply choose the best book that suited with your aim. Don't become doubt to change your life at this time book Fluoride: Drinking Ourselves to Death?: The Scientific Argument Against Water Fluoridation. You can more inviting than now.
