Interaction Flow Modeling Language: Model-Driven UI Engineering of Web and Mobile Apps with IFML (The MK/OMG Press) Marco Brambilla, Piero Fraternali

Interaction Flow Modeling Language describes how to apply model-driven techniques to the problem of designing the front end of software applications, i.e., the user interaction. The book introduces the reader to the novel OMG standard Interaction Flow Modeling Language (IFML). Authors Marco Brambilla and Piero Fraternali are authors of the IFML standard and wrote this book to explain the main concepts of the language. They effectively illustrate how IFML can be applied in practice to the specification and implementation of complex web and mobile applications, featuring rich interactive interfaces, both browser based and native, client side components and widgets, and connections to data sources, business logic components and services.

Interaction Flow Modeling Language provides you with unique insight into the benefits of engineering web and mobile applications with an agile model driven approach. Concepts are explained through intuitive examples, drawn from real-world applications. The authors accompany you in the voyage from visual specifications of requirements to design and code production. The book distills more than twenty years of practice and provides a mix of methodological principles and concrete and immediately applicable techniques.

- Learn OMG's new IFML standard from the authors of the standard with this approachable reference
- Introduces IFML concepts step-by-step, with many practical examples and an end-to-end case example
- Shows how to integrate IFML with other OMG standards including UML, BPMN, CWM, SoaML and SysML
- Discusses how to map models into code for a variety of web and mobile platforms and includes many useful interface modeling patterns and best practices

From reader reviews:

Cary Burgess:

A lot of people always spent all their free time to vacation or even go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you just read you can spent all day every day to reading a reserve. The book Interaction Flow Modeling Language: Model-Driven UI Engineering of Web and Mobile Apps with IFML (The MK/OMG Press) it is rather good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. In case you did not have enough space to bring this book you can buy often the e-book. You can more simply to read this book out of your smart phone. The price is not too expensive but this book has high quality.

Henry Evans:

In this time globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Often the book that recommended to you personally is Interaction Flow Modeling Language: Model-Driven UI Engineering of Web and Mobile Apps with IFML (The MK/OMG Press) this e-book consist a lot of the information with the condition of this world now. That book was represented how can the world has grown up. The words styles that writer require to explain it is easy to understand. The actual writer made some investigation when he makes this book. This is why this book suitable all of you.

Christopher Sanchez:

Is it a person who having spare time and then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Interaction Flow Modeling Language: Model-Driven UI Engineering of Web and Mobile Apps with IFML (The MK/OMG Press) can be the respond to, oh how comes? A fresh book you know. You are so out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?

Jennifer Evans:

Reading a guide make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is written or printed or created from each source this filled update of news. On this modern era like today, many ways to get information are available for a person. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just searching for the Interaction Flow Modeling Language: Model-Driven UI Engineering of Web and Mobile Apps with IFML

(The MK/OMG Press) when you needed it?
