Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia) Novartis Foundation

A number of chronic respiratory diseases including chronic bronchitis, asthma, cystic fibrosis and bronchiectasis are characterized by mucus hypersecretion. Following damage to the airway epithelium, a repair process of dedifferentiation, regenerative proliferation and redifferentiation takes place that is invariably accompanied by mucus hypersecretion as a key element in the host defence mechanism. In chronic respiratory diseases, however, excessive mucus production leads to a pathological state with increased risk of infection, hospitalization and morbidity. An understanding of the mechanisms that underlie and maintain this hypersecretory phenotype is therefore crucial for the development of rational approaches to therapy.

Despite a high and increasing prevalence and cost to healthcare services and society, mucus hypersecretion in chronic respiratory disease has received little attention until recently, probably because of the difficulties inherent in studying this pathology. Only in the last few years have some of the genes involved in mucus secretion been characterized. The recent availability of genomic sequence information and specific antibodies has led to an explosion of interest in this area making this publication particularly timely.

This book draws together contributions from an international and interdisciplinary group of experts, whose work is focused on both basic and clinical aspects of the problem. Coverage includes epidemiology, airways infection and mucus hypersecretion, the genetics and regulation of mucus production, models of mucus hypersecretion, and the implications of new knowledge for the development of novel therapies.

From reader reviews:

Michael Riddle:

What do you ponder on book? It is just for students because they're still students or the item for all people in the world, what the best subject for that? Only you can be answered for that issue above. Every person has distinct personality and hobby for each other. Don't to be pressured someone or something that they don't wish do that. You must know how great and also important the book Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia). All type of book would you see on many solutions. You can look for the internet resources or other social media.

Vincent Johnson:

This Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia) are usually reliable for you who want to be described as a successful person, why. The explanation of this Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia) can be on the list of great books you must have is giving you more than just simple reading through food but feed you actually with information that might be will shock your earlier knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed versions. Beside that this Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia) giving you an enormous of experience for example rich vocabulary, giving you test of critical thinking that could it useful in your day action. So , let's have it and enjoy reading.

Cheryl Kirkland:

A lot of reserve has printed but it is different. You can get it by internet on social media. You can choose the most effective book for you, science, witty, novel, or whatever by means of searching from it. It is referred to as of book Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia). You can add your knowledge by it. Without departing the printed book, it could add your knowledge and make an individual happier to read. It is most critical that, you must aware about e-book. It can bring you from one location to other place.

Helen Albertson:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is published or printed or outlined from each source in which filled update of news. With this modern era like right now, many ways to get information are available for anyone. From media social just like newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just seeking the Mucus Hypersecretion in Respiratory Disease (Novartis Foundation Symposia) when you needed it?
