Multiple Representations in Chemical Education: 4 (Models and Modeling in Science Education)

John K. Gilbert, David Treagust

Multiple Representations in Chemical Education: 4 (Models and Modeling in Science Education) John K. Gilbert, David Treagust

Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds. Doing so involves making use of three types of representation: the macro (the empirical properties of substances); the sub-micro (the natures of the entities giving rise to those properties); and the symbolic (the number of entities involved in any changes that take place). Although understanding this triplet relationship is a key aspect of chemical education, there is considerable evidence that students find great difficulty in achieving mastery of the ideas involved. In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels, the book discusses the learning involved, the problems that students encounter, and successful approaches to teaching. Based on the reported research, the editors argue for a coherent model for understanding the triplet relationship in chemical education.

From reader reviews:

Janice Nolan:

In this 21st century, people become competitive in most way. By being competitive today, people have do something to make them survives, being in the middle of the crowded place and notice by surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Yes, by reading a publication your ability to survive boost then having chance to stand than other is high. For you who want to start reading a book, we give you this specific Multiple Representations in Chemical Education: 4 (Models and Modeling in Science Education) book as basic and daily reading book. Why, because this book is greater than just a book.

Paulette Rodriguez:

Nowadays reading books be a little more than want or need but also become a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book which improve your knowledge and information. The details you get based on what kind of publication you read, if you want get more knowledge just go with education books but if you want experience happy read one with theme for entertaining such as comic or novel. Often the Multiple Representations in Chemical Education: 4 (Models and Modeling in Science Education) is kind of book which is giving the reader unstable experience.

Gail Boutwell:

The book Multiple Representations in Chemical Education: 4 (Models and Modeling in Science Education) has a lot of knowledge on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. Tom makes some research just before write this book. This kind of book very easy to read you can find the point easily after reading this book.

Shirley Bishop:

The book untitled Multiple Representations in Chemical Education: 4 (Models and Modeling in Science Education) contain a lot of information on the idea. The writer explains the woman idea with easy method. The language is very clear to see all the people, so do definitely not worry, you can easy to read that. The book was published by famous author. The author gives you in the new period of time of literary works. You can actually read this book because you can continue reading your smart phone, or model, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can wide open their official website and order it. Have a nice go through.
