Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences)

Federico Agnolin, Fernando E. Novas

Although consensus exists among researchers that birds evolved from coelurosaurian theropods, paleontologists still debate the identification of the group of coelurosaurians that most closely approaches the common ancestor of birds. The last 20 years witnessed the discovery of a wide array of avian-like theropods that has considerably amplified the anatomical disparity among deinonychosaurians, some of which resemble Archaeopteryx more than Deinonychus. Among these newly discovered theropods that show remarkable bird-like characteristics are the four-winged theropods Microraptor and Anchiornis, and the unenlagiids Unenlagia, Buitreraptor, and Rahonavis. A bizarre group of minute-sized coelurosaurs, the Scansoriopterygidae, also exhibits some avian similarities that lead some authors to interpret them as more closely related to birds than other dinosaurs. With the aim to explore the phylogenetic relationships of these coelurosaurians and birds, we merged recently published integrative databases, resulting in significant changes in the topological distribution of taxa within Paraves. We present evidence that Dromaeosauridae, Microraptoria, Unenlagiidae, and Anchiornis + Xiaotingia form successive sister taxa of Aves, and that the Scansoriopterygidae are basal coelurosaurians not closely related to birds. The implications in the evolutionary sequence of anatomical characters leading to birds, including the origin of flight, are also considered in light of this new phylogenetic hypothesis.

From reader reviews:

Deanna Ratliff:

The book Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences) make one feel enjoy for your spare time. You can use to make your capable considerably more increase. Book can for being your best friend when you getting stress or having big problem with the subject. If you can make reading a book Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences) being your habit, you can get a lot more advantages, like add your capable, increase your knowledge about some or all subjects. You could know everything if you like open up and read a publication Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences). Kinds of book are several. It means that, science guide or encyclopedia or other folks. So , how do you think about this publication?

James Vazquez:

Are you kind of active person, only have 10 or maybe 15 minute in your moment to upgrading your mind talent or thinking skill actually analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your limited time to read it because this all time you only find book that need more time to be go through. Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences) can be your answer because it can be read by you actually who have those short time problems.

Amber Payne:

Do you like reading a publication? Confuse to looking for your favorite book? Or your book has been rare? Why so many concern for the book? But just about any people feel that they enjoy for reading. Some people likes examining, not only science book but also novel and Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences) or perhaps others sources were given expertise for you. After you know how the great a book, you feel would like to read more and more. Science reserve was created for teacher or students especially. Those books are helping them to bring their knowledge. In other case, beside science e-book, any other book likes Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae (SpringerBriefs in Earth System Sciences) to make your spare time far more colorful. Many types of book like this.

Gail Nugent:

A number of people said that they feel bored stiff when they reading a reserve. They are directly felt the item

when they get a half parts of the book. You can choose the book *Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae* (SpringerBriefs in Earth System Sciences) to make your own reading is interesting. Your current skill of reading skill is developing when you just like reading. Try to choose straightforward book to make you enjoy to see it and mingle the idea about book and looking at especially. It is to be initially opinion for you to like to wide open a book and go through it. Beside that the e-book *Avian Ancestors: A Review of the Phylogenetic Relationships of the Theropods Unenlagiidae, Microraptoria, Anchiornis and Scansoriopterygidae* (SpringerBriefs in Earth System Sciences) can to be your new friend when you're feel alone and confuse using what must you're doing of these time.
