How to Change Minds About Our Changing Climate: Let Science Do the Talking the Next Time Someone Tries to Tell You...The Climate Isn't Changing; Global Warming ... Other Arguments It's Time to End for Good Seth B. Darling, Douglas L. Sisterson

The essential climate-debate handbook—everything you need to know about climate science to change minds

Have you ever heard someone say that climate change is simply the result of natural cycles? Or that there can't be global warming because it still gets so cold out? While the claims climate-change deniers make can seem, on their surface, quite plausible, they simply don't hold up against the evidence: Beyond a shadow of a doubt, science proves that climate change is real and primarily human-driven. But the next time a skeptic puts you on the spot, will you know what to say to end the argument?

How to Change Minds About Our Changing Climate dismantles all the most pernicious misunderstandings using the strongest explanations science has to offer. Armed with airtight arguments, you'll never be at a loss for words again—no matter how convincing or unexpected the misconception you're faced with. And with our planet's future in our hands, the time to change minds is now: The sooner we can agree, once and for all, that climate change is a significant threat to our well-being, the sooner we can start to do something about it.
