## **Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport)** Tim Horberry

Acceptance of new technology and systems by drivers is an important area of concern to governments, automotive manufacturers and equipment suppliers, especially technology that has significant potential to enhance safety. To be acceptable, new technology must be useful and satisfying to use. If not, drivers will not want to have it, in which case it will never achieve the intended safety benefit. Even if they have the technology, drivers may not use it if it is deemed unacceptable, or may not use it in the manner intended by the designer. At worst, they may seek to disable it.

This book brings into a single edited volume the accumulating body of thinking and research on driver and operator acceptance of new technology. Bringing together contributions from international experts from around the world, the editors have shaped a book that covers the theory behind acceptance, how it can be measured and how it can be improved. Case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology.

Although driver acceptance is the central focus of this book, acceptance of new technology by operators in other domains, and across cultures, is also investigated. Similarly, perspectives are derived from domains such as human computer interaction, where user acceptance has long been regarded as a key driver of product success.

This book comes at a critical time in the history of the modern motor vehicle, as the number of new technologies entering the modern vehicle cockpit rapidly escalates. The goal of this book is to inspire further research and development of new vehicle technology to optimise user acceptance of it; and, in doing so, to maximise its potential to be useful, satisfying to use and able to save human life.

### **From reader reviews:**

#### **Robin Millard:**

Do you certainly one of people who can't read satisfying if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) book is readable by you who hate the straight word style. You will find the information here are arrange for enjoyable looking at experience without leaving possibly decrease the knowledge that want to offer to you. The writer connected with Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) content conveys thinking easily to understand by many individuals. The printed and e-book are not different in the information but it just different as it. So , do you nevertheless thinking Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) is not loveable to be your top listing reading book?

#### **Mary Rohe:**

This book untitled Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) to be one of several books this best seller in this year, that's because when you read this guide you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail outlet or you can order it through online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Smartphone. So there is no reason for your requirements to past this book from your list.

#### **Guadalupe Baum:**

Reading can called head hangout, why? Because when you find yourself reading a book especially book entitled Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) your mind will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely will become your mind friends. Imaging each word written in a publication then become one contact form conclusion and explanation this maybe you never get ahead of. The Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport) giving you one more experience more than blown away your mind but also giving you useful information for your better life with this era. So now let us explain to you the relaxing pattern is your body and mind is going to be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

#### **Loretta Yoder:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person like reading or as reading become their hobby. You should know that reading is

very important and book as to be the issue. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You discover good news or update in relation to something by book. Numerous books that can you decide to try be your object. One of them are these claims Driver Acceptance of New Technology: Theory, Measurement and Optimisation (Human Factors in Road and Rail Transport).
