Difference Equations in Normed Spaces: Stability and Oscillations (North-Holland Mathematics Studies) Michael Gil

Difference equations appear as natural descriptions of observed evolution phenomena because most measurements of time evolving variables are discrete. They also appear in the applications of discretization methods for differential, integral and integro-differential equations.

The application of the theory of difference equations is rapidly increasing to various fields, such as numerical analysis, control theory, finite mathematics, and computer sciences. This book is devoted to linear and nonlinear difference equations in a normed space. The main methodology presented in this book is based on a combined use of recent norm estimates for operator-valued functions with the following methods and results:

- The freezing method
 - The Liapunov type equation
 - The method of majorants
 - The multiplicative representation of solutions
-
- Deals systematically with difference equations in normed spaces
 - Considers new classes of equations that could not be studied in the frameworks of ordinary and partial difference equations
 - Develops the freezing method and presents recent results on Volterra discrete equations
 - Contains an approach based on the estimates for norms of operator functions

From reader reviews:

Dorothy Pearce:

The book untitled Difference Equations in Normed Spaces: Stability and Oscillations (North-Holland Mathematics Studies) contain a lot of information on the item. The writer explains the girl idea with easy approach. The language is very clear and understandable all the people, so do certainly not worry, you can easy to read the item. The book was published by famous author. The author gives you in the new time of literary works. You can actually read this book because you can keep reading your smart phone, or gadget, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can open up their official web-site as well as order it. Have a nice read.

Susan Rooks:

Many people spending their time period by playing outside having friends, fun activity having family or just watching TV all day every day. You can have new activity to enjoy your whole day by looking at a book. Ugh, think reading a book can really hard because you have to bring the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Cell phone. Like Difference Equations in Normed Spaces: Stability and Oscillations (North-Holland Mathematics Studies) which is getting the e-book version. So , try out this book? Let's see.

Debra Yarbrough:

As a pupil exactly feel bored to help reading. If their teacher inquired them to go to the library or to make summary for some publication, they are complained. Just tiny students that has reading's heart or real their pastime. They just do what the professor want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Difference Equations in Normed Spaces: Stability and Oscillations (North-Holland Mathematics Studies) can make you sense more interested to read.

Ramona Wrenn:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is published or printed or highlighted from each source which filled update of news. Within this modern era like today, many ways to get information are available for a person. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just in search of the Difference Equations in Normed Spaces: Stability and Oscillations (North-Holland Mathematics Studies) when you necessary it?
