Inflammation in Heart Failure

Inflammation in Heart Failure

Inflammation in Heart Failure, edited by W. Matthijs Blankesteijn and Raffaele Altara, is the first book in a decade to provide an in-depth assessment on the causes, symptoms, progression and treatments of cardiac inflammation and related conditions. This reference uses two decades of research to introduce new methods for identifying inflammatory benchmarks from early onset to chronic heart failure and specifically emphasizes the importance of classifying at-risk subgroups within large populations while determining the patterns of cytokines in such classifications. Further, the book details clinical applications of the pathophysiological mechanisms of heart failure, diagnosis and therapeutic strategies. *Inflammation in Heart Failure*'s breadth of subject matter, easy-to-follow structure, portability, and high-quality illustrations create an accessible benefit for researchers, clinicians and students.

- Presents updated information and research on the relevant inflammatory mediators of heart failure to aid in targeting future translational research as well as the improvement of early diagnosis and treatment
- Provides research into better understanding the different inflammatory mediators that signal the underlying diseases that potentially lead to heart failure
- Contains 20 years of research, offering a brief overview of the topic leading to current opinions on, and treatment of, heart failure
- Provides a structured, systematic and balanced overview of the role of inflammation in heart failure making it a useful resource for researchers and clinicians, as well as those studying cardiovascular diseases
