Although very little can be done to alter the course of dementia, much can be done to maximize the quality of life of people with the condition. Research as well as practical experience suggest that behavior management, especially through programs that provide meaningful and constructive activity, is currently the most effective treatment.

In *Keeping Busy*, James Dowling describes a variety of activities designed to bring meaning and enjoyment to the lives of persons with dementia. The activities are organized by general categories such as music, exercise, horticulture, pets, humor, and social events. The description of each activity includes step-by-step instructions, as well as tips on how to adapt it for small or large groups, for individuals at home or in an organization, or people who are bedridden.
