Have you ever heard someone say that climate change is simply the result of natural cycles? Or that there can't be global warming because it still gets so cold out? But the next time a skeptic puts you on the spot, will you know what to say to end the argument?

How to Change Minds About Our Changing Climate dismantles all the most pernicious misunderstandings using the strongest explanations science has to offer. Armed with airtight arguments, you'll never be at a loss for words again?no matter how convincing or unexpected the misconception you're faced with. And with our planet's future in our hands, the time to change minds is now: The sooner we can agree, once and for all, that climate change is a significant threat to our well-being, the sooner we can start to do something about it.
