Schering Workshop on Pharmacokinetics, Berlin, May 8 and 9, 1969: Advances in The Biosciences: v. 5

Advances in the Biosciences 5: Schering Workshop on Pharmacokinetics, Berlin, May 8 and 9, 1969 is a collection of papers presented at the Schering Workshop on Pharmacokinetics held in Berlin, Germany, on May 8 and 9, 1969. Contributors focus on advances in the field of pharmacokinetics, including the use of digital computers in defining pharmacokinetic parameters and of mathematical models in the study of steroid dynamics. The pharmacokinetics of acetazolamide and endogenous substances is also described.

This book is comprised of 19 chapters and begins with an overview of the basic concepts and experimental methods of pharmacokinetics, followed by a discussion on the general physico-chemical aspects of drug distribution. Subsequent chapters explore multiple dose elimination kinetics and drug accumulation in patients with normal and impaired kidney function; the application of analog and digital computers in pharmacokinetics; use of mathematical tools in defining pharmacokinetic parameters; and measurement of enteric absorption rate using a double tracer technique. Mathematical and statistical problems in pharmacokinetics are also presented.

This monograph will be a useful resource for pharmacologists and biologists.
